

# NAF<sup>®</sup> Duball<sup>™</sup> DL Ball Valves

## Primary characteristics

The NAF Duball DL valve is a full-bore ball valve which is equally suitable for isolation, on/off and modulating control applications. The NAF Duball DL valve is supplied as standard in stainless steel or carbon steel, but is also available in other materials, such as duplex stainless steel, titanium, etc.

The NAF Duball DL valve is the fourth generation of the Duball valve portfolio, one of the most proven ball valve portfolios in the industry.

The valve has:

- A **spring-loaded stem seal packing** that provides long, maintenance-free and safe operation in automated on/off and control service
- **Direct actuator mounting capabilities** of the NAF Turnex actuator that provide a high-performance, vibration-resistant, compact valve package
- A sturdy, **blowout-proof stem** with a long foot providing a high-torque transmission with a **minimum mechanical backlash**
- A floating ball that provides **bidirectional tightness**
- The **unique Z-trim** option that **minimizes cavitation and noise** and has **excellent control characteristics**
- An **extensive size range**, DN 25 to 400, NPS 1 to 16
- An **easy-to-service arrangement**, due to the off-center joint face of the valve body, which allows for easy replacement of the ball and seals, without the need for removing the stem and actuator
- **Metal seats** with a rigid welded overlay of Alloy 6 or alternatively, **metal encapsulated, reinforced PTFE seats**
- A wide range of **optional versions**, including **fire-safe** tested versions per API 607/ISO 10497
- **CE-marked** according to Pressure Equipment Directive (PED 2014/68/EU) module H, category III. For module H1, category IV, contact Flowserve.

**Table 1: Technical specifications for standard design**

Options	PN	ASME
<b>Material</b>	Stainless steel, carbon steel	Stainless steel, carbon steel
<b>Size range</b>	DN 25 to 400	NPS 1 to 16
<b>Pressure ratings</b>	PN 10 to 40	ASME Class 150 to 300
<b>Face-to-face lengths</b>	PN 10 to 16: EN558-1 series 12 (SSG 1042) PN 25 to 40: EN558-1 series 4 (SSG 1043)	Class 150: ASME B16.10 Class 150 long Class 300: NPS 1 to 12, ASME B16.10 short NPS 14 to 16, ASME B16.10 long
<b>Valve design</b>	EN 12 516	ASME B16.34
<b>Installation method</b>	Flanges to EN	ASME B16.5
<b>Temperature range</b>	Standard version: -30°C to 250°C (-22°F to 482°F) High-temperature version: available up to 500°C (932°F)	
<b>Test procedure</b>	Body: 1.5 x maximum working pressure Seat: 1.1 x maximum allowed differential pressure Testing medium is water with inhibitor <sup>1</sup>	
<b>Tightness class</b>	Soft seats: EN 12266-1:2012, rate A (ISO 5208, rate A), tested with water <sup>1</sup> Metal seats: EN 60534-4 Class V, ASME FCI 70-2 Class V, tested with water <sup>1</sup>	

<sup>1</sup> Gas test upon request

## **Applications**

The excellent characteristics of NAF Duball DL valve are particularly beneficial under the most challenging operating conditions in the process industry, where difficult media and demanding pressure conditions make severe demands on the design, materials and performance.

NAF Duball DL valve is recommended for applications in the following industries:

- Chemical and Petrochemical
- Pulp and Paper
- Oil and Gas
- Power Stations
- Metals and Mining
- General Industries

## Materials of construction

20	2	Key	A4	

<sup>1</sup> Material combinations others than those specified are available to order. Consult your Flowserve NAF valve representative.

<sup>2</sup> Recommended spare parts  
<sup>3</sup> Quantity depends on the size.

<sup>4</sup> CF8M = ASTM A351 Grade CF8M  
<sup>5</sup> 1.4408 = EN 10213-4 1.4408  
<sup>6</sup> WCB = ASTM A216 Grade WCB

## Seats

**Metal seat (standard)**

**Soft seat (standard)**

### Optional seat designs

#### Scraper seat

Seat ring with scraper edge.

Option: S (see page 15, section 11)

#### Sealed seat

Seat rings with two O-rings to prevent media penetrating behind seat ring.

Used with media that crystallize.

(For temperature limitations, please see code 8 in the product code.)

Option: T (see page 15, section 11)

#### Spring-loaded seat

If the differential pressure is low (below 0.5 bar) and a specified tightness must be maintained, O-rings or springs must be fitted behind the seat rings.

Option (see page 15, section 11):

E For temperature limitations, please see code 8 in the product code.

W Wave spring max; 250°C (482°F)

#### Locked seat rings

All valves are prepared for locking of the seat rings in the form of peening-over.

Option: L (see page 15, section 11)

## Working pressures and temperatures

### Maximum working pressure PN rated valves

Stainless steel body (CF8M)

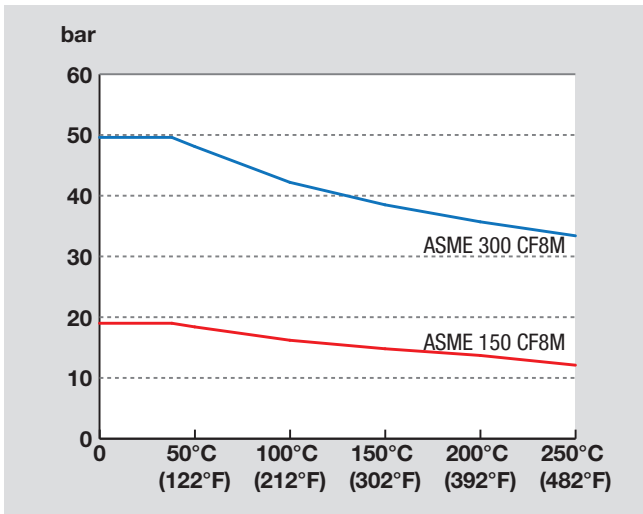

Carbon steel body (WCB)

### Maximum working pressure ASME rated valves

Stainless steel body (CF8M)

Carbon steel body (WCB)

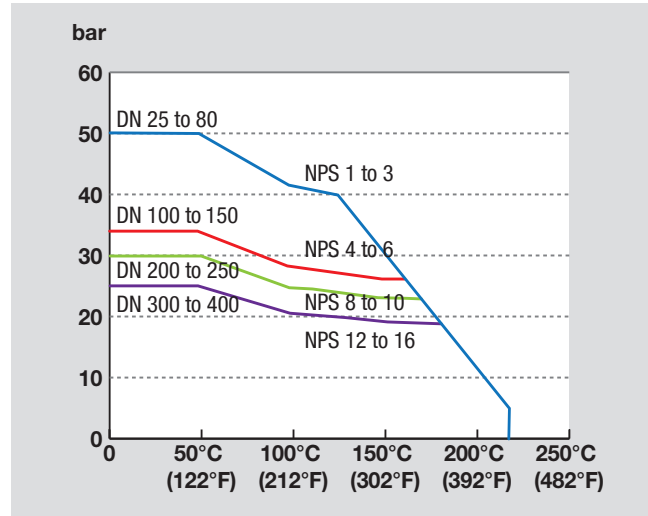

## Differential pressures and temperatures

Maximum differential pressure Alloy 6 seat

Please note that the maximum allowed differential pressure can be further reduced if the maximum allowed working pressure, based on body material and pressure class of the valve, is lower than the maximum allowed differential pressure.

Maximum differential pressure R-PTFE seat

Soft R-PTFE seat ratings are based on differential pressure with the ball in the fully closed position and refer only to the seats. The maximum allowed differential pressure can be further reduced if the maximum allowed working pressure, based on body material and pressure class of the valve, is lower than the maximum allowed differential pressure.

## Operating torques and flow capacities

<sup>1</sup> The specified torques in this table are for clean media. When using Alloy 6 seat rings in steam applications, increase the required torque by a factor of 1.5. If the media is slurry or contains solids, etc., consult Flowsolve.

<sup>2</sup> The minimum design differential pressure for selecting the actuator is 5 bar.

<sup>3</sup> Torques given at maximum allowable differential pressure of 34 bar.

## Dimensions and weights – valve plus actuation

NAF Duball valves are available with hand levers or pneumatic or electric actuators and accessories.

If other pneumatic or electric actuators are required, consult your Flowserve NAF valve representative.

The maximum differential pressure for selected actuator and valve is based on torque values in Table 3 and is valid for clean media, e.g. water. For steam and other media, please see notes under Table 3.

**Table 7: NAF Duball DL valves with hand levers and worm gears**

<sup>1</sup> These differential pressures apply for clean media type water at 20°C (68°F). For other media, contact Flowserve. See also Table 3 notes on page 8.

<sup>2</sup> Applies to average weight of a PN 40 valve + NAF Turnex actuator.

<sup>3</sup> Including all direct mount Flowserve positioners.

## Options

### NAF Turnex actuator

A pneumatic NAF Turnex actuator can be directly mounted to the NAF Duball DL valve without any couplings or brackets. Together with the direct mounting capabilities of several of the Flowserve positioners, this provides a high-performance, vibration-resistant and compact valve package suitable for precision control.

Please see data sheet for further information on the NAF Turnex actuator capabilities and all other available accessories.

### Valve designs

#### Degreased

NAF Duball DL valves are available with option D, which needs to be specified for any application where a degreased version is needed. In this version, all components are degreased before assembly and a special grease is used in assembly. (This version is not approved for oxygen service.)

Option: D (see page 15, section 11)

#### Explosive atmosphere

When intended for use in an explosive atmosphere, please specify NAF Duball DL valves with option XA. With this option, the valve is certified according to ATEX 94/9/EC  II 2 G/D c.

Option: XA (see page 15, section 11)

#### Fire-safe

NAF Duball DL valves are available in fire-safe versions tested according to API 607, 6<sup>th</sup> edition (soft seated versions) and ISO 10497:2010 (soft and metal seated versions). For a list of approved versions, please contact your Flowserve NAF valve representative.

Option: Z (see page 15, section 1, only together with stem seal F in code 9)

#### High-temperature

Two high-temperature versions of the NAF Duball DL valve are available. The standard high-temperature version is suitable for temperatures up to 350°C (662°F). A special high-temperature version that is suitable for temperatures up to 500°C (932°F) may be ordered on request. This version uses special materials for the bushings, stem packing, washers, seals etc. The stem is extended, allowing actuator mounting at high temperatures. For a detailed specification, please contact your Flowserve NAF valve representative.

## Product code

Example:

**88 8 4 K F - 0006 - BAB A E A - L**  
**Code**    1   2   3   4   5   6   7   8   9   10   11

### 1. Valve type

**88 NAF Duball DL**

**Z-88** NAF Duball DL with Z-trim option<sup>1</sup>

### 2. Material<sup>2</sup>

**6** WCB (~EN 1.0619)

**8 CF8M (~EN 1.4408)**

### 3. Pressure rating

**2** PN 10                      DN 200 to 400<sup>3</sup>

**3** PN 16                      DN 80 to 400

**4** Class 150                  NPS 1 to 16

**5** PN 25                      DN 200 to 400<sup>3</sup>

**6** PN 40                      DN 25 to 400

**7** Class 300                  NPS 1 to 16

### 4. Stem bearing

**K R-PTFE, carbon-reinforced**

### 5. Body type

**F Flanged**

### 6. Size

PN ratings		Class ratings	
	DN		NPS
<b>0025</b>	25	<b>0001</b>	1
<b>0040</b>	40	<b>01.5</b>	1.5
<b>0050</b>	50	<b>0002</b>	2
<b>0065</b>	65	<b>02.5</b>	2.5
<b>0080</b>	80	<b>0003</b>	3
<b>0100</b>	100	<b>0004</b>	4
<b>0125</b>	125	<b>0005</b>	5
<b>0150</b>	150	<b>0006</b>	6
<b>0200</b>	200	<b>0008</b>	8
<b>0250</b>	250	<b>0010</b>	10
<b>0300</b>	300	<b>0012</b>	12
<b>0350</b>	350	<b>0014</b>	14
<b>0400</b>	400	<b>0016</b>	16

### 7. Seat, ball<sup>2</sup> and ball overlay

	Seat	Ball	Overlay
<b>AAA</b>	<b>R-PTFE, carbon-reinforced</b>	<b>CF8M / 316 (~EN 1.4408)</b>	-
<b>BAB</b>	<b>Alloy 6 overlay/SS</b>	CF8M / 316 (~EN 1.4408)	<b>Hard chrome</b>
<b>BAC</b>	Alloy 6 overlay/SS	CF8M / 316 (~EN 1.4408)	Electroless nickel
<b>BAD</b>	Alloy 6 overlay/SS	CF8M / 316 (~EN 1.4408)	Alloy 6
<b>BBA</b>	Alloy 6 overlay/SS	Solid Alloy 6	-

### 8. Seat seal

**A R-PTFE, carbon-reinforced, max T=250°C**

**B** EPDM O-ring (for options E and T), max T=130°C

**C** FPM O-ring (for options E and T), max T=130°C

**E** PFM O-ring (for options E and T), max T=250°C

**H** H-ELAST (same media resistance as EPDM), max T=250°C

### 9. Stem seal

**E Spring-loaded R-PTFE V-rings, carbon-reinforced**

**F** Spring-loaded graphite + R-PTFE V-rings, carbon-reinforced

### 10. Stem material

**A Duplex EN 1.4460 (~AISI 329)**

### 11. Options<sup>4</sup>

**D** Degreased

**E** Spring-loaded seats, O-rings

**L** Locked seats

**S** Scraper seat

**T** Sealed seat

**W** Spring-loaded seats, wave springs

**XA** ATEX certified

**Z** Fire-safe approved design

Versions marked in bold text are the standard versions with shortest lead time.

<sup>1</sup> Sizes DN 50 to 400, NPS 2 to 16

<sup>2</sup> For material CF8, CF3M, CG3M, CG8M, Duplex EN 1.4470, CW-12MW, 904L, M35-01, CK3MCuN, titanium B367 Grade C2, 904L etc., please contact Flowserve.

<sup>3</sup> Sizes 25 to 50 have the same dimensions in PN 10, PN 16, PN 25 and PN 40. Choose PN 40 for these sizes.

Sizes 65 to 150 have the same dimensions in PN 10 and PN 16. Choose PN 16 for these sizes.

Sizes 65 to 150 have the same dimensions in PN 25 and PN 40. Choose PN 40 for these sizes.

<sup>4</sup> If a combination of several options is specified, please add them to a multi-sign code in alphabetic order.

Flowserve Corporation has established industry leadership in the design and manufacture of its products. When properly selected, this Flowserve product is designed to perform its intended function safely during its useful life. However, the purchaser or user of Flowserve products should be aware that Flowserve products might be used in numerous applications under a wide variety of industrial service conditions. Although Flowserve can provide general guidelines, it cannot provide specific data and warnings for all possible applications. The purchaser/user must therefore assume the ultimate responsibility for the proper sizing and selection, installation, operation, and maintenance of Flowserve products. The purchaser/user should read and understand the Installation Instructions included with the product, and train its employees and contractors in the safe use of Flowserve products in connection with the specific application.

While the information and specifications contained in this literature are believed to be accurate, they are supplied for informative purposes only and should not be considered certified or as a guarantee of satisfactory results by reliance thereon. Nothing contained herein is to be construed as a warranty or guarantee, express or implied, regarding any matter with respect to this product. Because Flowserve is continually improving and upgrading its product design, the specifications, dimensions and information contained herein are subject to change without notice. Should any question arise concerning these provisions, the purchaser/user should contact Flowserve Corporation at any one of its worldwide operations or offices.
